YOUR VOICE MATTERS

Have you been accused of a crime in France?
Have you dealt with the police, a court, or a lawyer?

And French is not your first language?

I would like to speak to you

Who am I?

I am a researcher (PhD candidate) at the Université de Reims Champagne-Ardenne (URCA) and working on a study about the difficulties faced by people who do not speak French well and who have had difficulties with the police and the justice system.

Your safety comes first

- ✓ **Anonymous and confidential** — you don't need to give me your name or details of your case etc.
- ✓ **Talking to me will have no impact** on your legal situation or immigration (séjour) status.
- ✓ **You can refuse to answer any question or stop the conversation at any time**, without giving any explanations.

How does it work?

- A **30–60 minute** conversation at a time and place we choose together (café, restaurant etc.).
- ★ **Your experience can help** us understand what kind of problems are experienced by foreign-language speakers and try and find solutions. I will be grateful for your contribution to my research project.

Contact me directly or through your NGO/lawyer or person of trust:
